the encoder: what the world model reads
reads the outcome, level with the judge
misses its threshold
last-frame latent, linear probe
on 69 rollouts it never saw
outcome AUROC 0.9545 (colour judge 0.9432,
frozen DINOv2-S 0.8655, joints 0.7573)
45 to 2,909 episodes: 0.931 to 0.897
level with the judge at every size
the predictor: what it forecasts
imagined latents from the current
latent and the commanded actions
chunk ranking 0.60 of anchors (bar 0.8), commanded actions
alone 0.68–0.90; surprise monitor catches 2/8 failures with 2/42 false alarms
45 to 2,909 episodes: best cell 0.422, 0.605,
0.279, 0.230; never above the floor
